PowerBlasters & Accessories

This brochure provides you with our current 2015 product and price list. We have several *Kit Packages* offering a 5% discount over the individual component pricing (pre-calculated into the

HC1414E PowerBlaster IIIIE with 30-pattern controller

kits at right.) These kits provide a variety of triggering methods and accessories in addition to the *PowerBlaster* air-cannon, providing a flexible prop package to fit into myriad sets & scenes. Three of the kits include our updated 30-pattern programmable control *PowerBlaster IIIIE*. The fourth is our economy single-blast *DogHouse Blaster*. All of our air-cannons use a low voltage 24VAC power supply for safety.

All our air cannons can now be purchased with or without an air tank due to a new controller mounting method. Save on the tank and shipping by providing your own!

New Items: Be sure to check out our *HC0109 Hand-held Air Machine Gun* accessory. This unit integrates an air gun, trigger and discharge hose into an easily operated prop for an actor. Cool sound effect, and with the synchronized *HC1200EB Strobe*, pretty scary in the dark! (Upgraded with industrial quality rubber hose!)

Also check out the *HC2215 Programmable Logic Power Relay*. In addition to controlling a 10A 120VAC load from an isolated trigger source, this unit can be easily user-programmed via the internal dual timer. ON time and RETRIGGER delay can be independently set from 0-120 seconds.

We have added several new motion sensing trigger units that use passive or active IR (infra-red) light. The *HC1011 PIR Sensor* works like our HC1010 battery motion sensor but in a barrel format with a 3-wire interface. The *HC1015 DIR Sensor & HC1016 RIR Sensor* are Diffuse and Retro-reflector active motion sensors respectively, also in barrel form, with 3-wire interfaces. All three are available with and w/o connectors at the end of the 5' cable to create custom interfaces. The HC205 5VDC supply and trigger interface is available for direct triggering of our air cannons.

The *HC1416D/DA DogHouse Blaster* is our newest air cannon. Unitized controller and valve just screws into *YOUR* tank. Programmable and weather resistant. One good blast like that bad dog bark from the back alley! DA version has integral HC1011 PIR Sensor connector.
